Forecast For East Midlands
Issued by Met Office Exeter
at 0400 on Wednesday 13 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Rain moving slowly eastwards, perhaps turning to sleet overnight.

Today:
A dry and frosty start to the day with some hazy sunshine. Becoming cloudy during the afternoon, with patchy light rain pushing eastwards though remaining largely dry in eastern parts. A cold day. Maximum temperature 3 deg C (37 deg F).

Tonight:
Rain becoming heavier and persistent during the evening, locally turning to sleet at low levels later in the night. Snow over the Derbyshire hills. A cold night. Minimum temperature 1 deg C (34 deg F).

Thursday:
Outbreaks of rain, snow over high ground, slowly easing through the morning whilst becoming confined to the west. Some bright spells likely in Lincolnshire by the afternoon. Remaining cold. Maximum temperature 4 deg C (39 deg F).

Outlook for Friday to Sunday:
Cold on Friday, with early morning frost and isolated fog patches. Windy with rain on Saturday, occasionally heavy. Breezy, largely dry on Sunday, some occasional sunshine.
